12/2017

B.sc (Computer Science)

Thiruvalluvar College • Tirunelveli, Tamilnadu
05/2015

Certificates

Web Development, Java

Project Link

- **Portfolio website**

 A portfolio website is a personal or professional online platform where individuals, such as artists, designers, or freelancers, showcase their work, skills, and achievements. It typically includes a gallery of their best projects, a brief bio, and a resume. Contact information and links to social profiles may be provided for networking and inquiries. The design of the website should reflect the individual's style and brand. It serves as a powerful tool for self-promotion and attracting potential clients or employers.

- **Food and Restaurant Website**

A food and restaurant website serves as an online platform for showcasing a restaurant's menu, location, and ambiance. It provides customers with the ability to view the menu, make reservations, and even place online orders for delivery or takeout. These websites often include high-quality images of the cuisine and the restaurant itself. User reviews and ratings may also be featured to help visitors make dining decisions. Additionally, contact information and operating hours are typically provided for customer convenience.
